Individual

Problem

Sales teams read customer messages every day, but writing-style signals are easy to miss.

Most profiling is either too vague to act on or too risky because it drifts into labels, guesses, and manipulation.

Sellers need a fast, repeatable way to read communication style and adapt the next engagement with clarity and respect.

Solution

Customer Personality Profile turns a customer writing sample into an ethical Big Five / OCEAN sales profile.

It produces five focused metrics, relative signal strength, short sales comments, and one practical next move.

The output is available as a polished HTML report and a reusable Codex skill for repeat use across teams.

Usage

- 1 Clone the repo**
Use org-approved GitHub access.

```
git clone git@github.com:ihrushi/customer-personality-profile.git
```
- 2 Install the skill locally**
Copy the packaged skill into Codex skills.

```
mkdir -p ~/.codex/skills  
cp -R customer-personality-profile/skills/sales-psychometric-profile ~/.codex/skills/
```
- 3 Run the profile**
Ask Codex to use sales-psychometric-profile, then paste the customer writing sample.
- 4 Use the output**
Review OCEAN scores, relative signal strength, short sales comments, sales posture, and next move.
- 5 Open the report app**
Use ocean-profile-report.html, or serve the repo with `python3 -m http.server 4174`.
